Unburnable Carbon; Invite to Conference Call with Mark Fulton of Carbon Tracker Initiative - ALERT

The Carbon Tracker Initiative is a non-profit organization focused on aligning capital markets with the implications of climate change policy. The Carbon Tracker team believes equity markets embed a poorly understood systemic risk associated with the mispricing of carbon assets that are ultimately unusable in the context of climate change policy. This is an actionable idea that has implications for energy investors.

Please join us on **Monday, September 30th, at 3.00pm ET** for a conference call with Mark Fulton, Advisory Board member of the Carbon Tracker Initiative.

Mark Fulton has had 35 years of experience as a recognized economist and market strategist at leading global financial institutions, including head of research at Deutsche Bank Climate Change Advisors from 2007 to 2012. Mark has served on United Nations climate change working groups and is currently a member of the Capital Markets Climate Initiative, UK Department of Energy and Climate Change, as well as being a member of the Carbon Tracker Initiative.

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:
J.P. Morgan uses the following rating system: Overweight [Over the next six to twelve months, we expect this stock will outperform the average total return of the stocks in the analyst's (or the analyst's team's) coverage universe.] Neutral [Over the next six to twelve months, we expect this stock will perform in line with the average total return of the stocks in the analyst's (or the analyst's team's) coverage universe.] Underweight [Over the next six to twelve months, we expect this stock will underperform the average total return of the stocks in the analyst's (or the analyst's team's) coverage universe.] Not Rated (NR): J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. In our Asia (ex-Australia) and U.K. small- and mid-cap equity research, each stock's expected total return is compared to the expected total return of a benchmark country market index, not to those analysts' coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying analyst's coverage universe can be found on J.P. Morgan's research website, www.jpmorganmarkets.com.
