J.P.Morgan

Equity Strategy

Bond yields move from here? Utilities weakness has likely gone too far; Real Estate is of interest, too

- With respect to bond yields' direction, our call last October was to go long duration, that bond yields have likely peaked. After the ytd bounceback, we think that yields will resume moving lower. Our FI team forecasts that US and German 10-year yields will be below current on 3-, 6- and 9-month horizons.
- We fundamentally agree with this, especially given the elevated geopolitical risks at present, but note the risks of inflation staying too hot. The Fed might be wrong to assume that all the recent inflation pickup is transitory; also the term premia are outright negative again - pointing to inflation complacency. If bond yields end up moving higher from here, against our base case view, that might be "for the wrong reasons", with market weakening in that scenario, like last summer. Given the potential for inflation overshoot, the basket of stocks with high financing costs – JPDEHFCL – could stay under pressure.
- Now, irrespective of how one sees the bond yields' direction from here, we think that the Utilities sector's poor performance has likely gone too far. If yields fall, as is our core view, that should help the sector. In the opposite scenario, the overall market could weaken, and the typical low beta of Utilities could come to the fore. In addition:
- 1. The client concern is with respect to perceived elevated leverage of the sector, but we think this is misplaced. Leverage is higher than in the past, but cash flow generation is strong and Utilities stocks are solidly investment grade. They have a lot of network exposure which is more stable, and will receive subsidies to finance capex.
- 2. Power prices should not go lower from here. Industrial demand is starting to come back. Utilities have been derated to pre-Ukraine levels, but power prices are still higher than pre-Ukraine.
- 3. Earnings relative of Utilities are continuing to move up, making the sector very attractive at present. P/E relative of Utilities is near record cheap – middle chart. Dividends will keep increasing for Utilities, and the sector offers the highest dividend yield vs other Defensives.
- 4. Renewables have been underperforming the rest of the sector for more than three years now, and are increasingly attractively priced. They are very capital intensive, but the cost of capital might be peaking, and come down. Renewables lose on legacy assets when rates are up, so a decline in rates is an important consideration for the subgroup. Renewables should see gradual improvement in sentiment, and new contracts are set to be more attractive.
- We also think that **Real Estate** should be looked at again, even as bond yields direction likely remains the key for the group - the sector is unlikely to work if yields move up further. Real Estate had a brief respite in Q4, as bond yields fell 100bp, but has struggled again ytd. Fundamentally, data centers and industrial demand are the bright spots, and the push for return to office could be a help, as occupancy is still low. Refinancing prospects are improving, with some recovery in pricing.

Bond yields move from here? Utilities weakness has likely gone too far; Real Estate is of interest, too

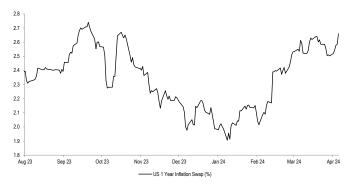

Figure 1: US 10Y bond yield

Source: Bloomberg Finance L.P.

While bond yields are still meaningfully lower than last October, they have picked up ytd. This driven by the pushing out of the start of Fed cuts, partly due to stronger dataflow, but also due to more sticky inflation prints.

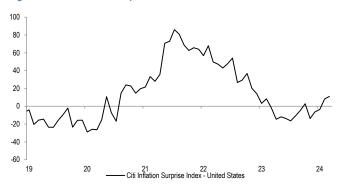

Figure 2: US 1-year inflation swap rate

Source: J.P.Morgan

Near-term Inflation expectations have been moving higher.

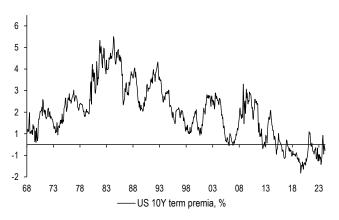

Figure 3: Citi Inflation Surprise Index - United States

Source: Bloomberg Finance L.P.

Inflation prints have been hotter than expected in the last few months.

Figure 4: US 10Y term premia

Source: J.P.Morgan

Bond market is relatively relaxed with respect to the inflation outlook, as the term premia on bonds are outright negative. Investors are not prepared for the risk of inflation overshoot, which may be too complacent.

Table 1: JPM 10Y bond yield forecast

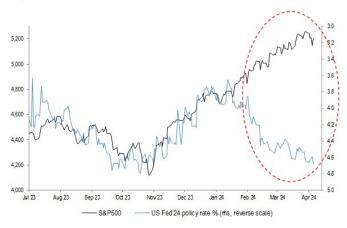

10 Yr Govt BY		Forecast for end of			
	5-Apr-24	Jun 24	Sep 24	Dec 24	Mar 25
US	4.40	4.15	4.05	4.00	3.90
Euro Area	2.40	2.20	2.05	1.90	1.80
United Kingdom	4.07	4.05	3.95	3.80	3.65
Japan	0.79	0.85	1.05	1.30	1.30

Source: J.P.Morgan

J.P.Morgan's Fixed Income strategists are calling for bond yields to move lower from here, on all the investment horizons, with the exception of Japan. We fundamentally agree with this call, but the risk is of inflation overshoot.

Figure 5: S&P500 and Fed funds futures

Source: J.P.Morgan

If bond yields move further up, chances are that market weakens, like last summer.

If bond yields keep moving higher, against JPM call, that could be a continuing problem for corporates facing refinancing pressure

Source: Bloomberg Finance L.P., J.P. Morgan, all stocks are liquidity weighted in the basket

If rates stay higher for longer, it may end up being a problem for companies which need to roll over existing debt or borrow more capital. We believe that our basket of highly leveraged companies that will likely need to access the market for capital could appear quite vulnerable in such an situation.

Figure 6: JPM European losers of high financing costs basket relative

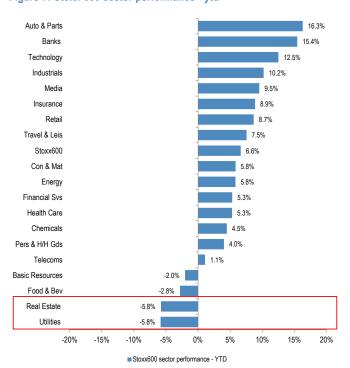

Source: Bloomberg Finance L.P., J.P. Morgan

This basket has lagged the broader market by more than 10% since the start of last year, and could remain under pressure.

Now, irrespective of the bond yield view, Utility sector's underperformance might have gone too far

Figure 7: Stoxx 600 sector performance - ytd

Source: Bloomberg Finance L.P.

Utilities are the worst performing sector in Europe so far this year. Real Estate sector has also lagged by a similar magnitude.

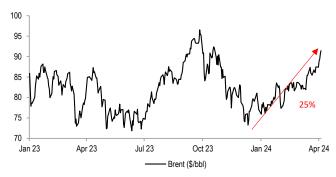

Figure 8: MSCI Europe Utilities relative and US 10Y bond yield

Source: Datastream, Bloomberg Finance L.P.

The sector is seen as a highly leveraged bond proxy, and is the preferred short as investors position for higher bond yields. We note though that post this extreme period of weakness the sector has some cushion even if yields were to rise further. In fact, if bond yields rise from here, the overall market could fall, in our view, which could make the low beta of Utilities more attractive. If yields stop going higher, as JPM FI team expects, then the sector could see a respite, anyway.

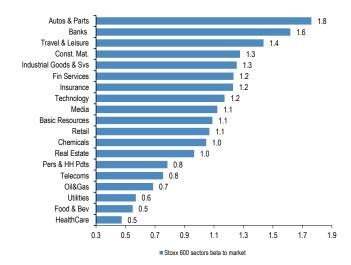

Figure 9: Brent

Source: Bloomberg Finance L.P.

Given the low levels of Vix at present and the rising geopolitical uncertainty, as see in oil prices up almost 25% from their recent low, the overall equity market might be too complacent as present.

Figure 10: European sectors beta to SXXP

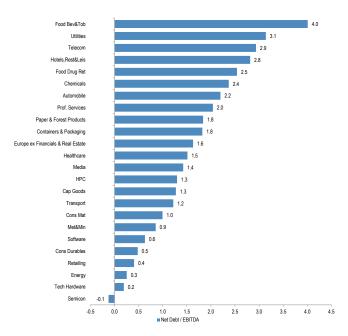

Source: Bloomberg Finance L.P.

There is a risk that Fed may have prematurely declared victory on inflation. There is also a possibility of a sharp reversal in markets if some of the geopolitical concerns in Middle East spike. We believe equities overall would be vulnerable and the low beta nature of the Utility sector may enable it to outperform even as yields move up under these scenarios. In effect, the Utilities sector could outperform the market regardless of the direction of yields. In addition:

1. Strong cash flow generation allays concerns around the sector's leverage

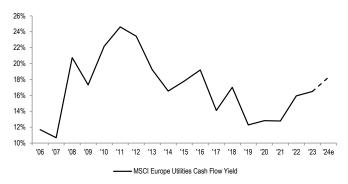

Figure 11: European L2 sectors Net Debt to EBITDA

Source: Worldscope

At 3.1x Net Debt to EBITDA, Utilities are among the most leveraged of the European sectors.

Figure 12: MSCI Europe Utilities Cash Flow yield

Source: IBES

However, this in itself is not a major concern given the strong cash flow generation of the sector.

Table 3: MSCI Europe Utilities companies' credit ratings

Acciona Energy			100%	100%		

Source: JPM European Utilities team

It is also worth highlighting that a major chunk of the sector's revenues comes from its exposure to networks. This revenue stream is very stable and underpins the current dividend commitments for most of them.

2. Power prices are down significantly in the last few months, but further downside may be limited

J.P.Morgan

Figure 13: Germany 1-year forward power price

Source: Bloomberg Finance L.P.

European power prices rose sharply after Russia's invasion of Ukraine but have been falling for the last couple of years.

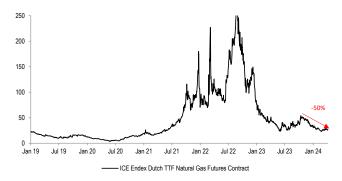

Figure 14: German 1Y forward power price, average

Source: Bloomberg Finance L.P.

It is worth flagging though that power prices are still well above the levels seen pre Ukraine.

Figure 15: TTF Natural Gas price, 1Y forward

Source: Bloomberg Finance L.P.

The fall in power prices has broadly tracked the decrease in European natural gas prices.

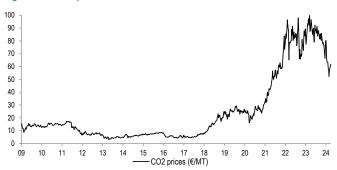

Table 5: JPM Commodities TTF price outlook

	Current	2Q24e	3Q24e	4Q24e	2024
TTF Price	27.56	23.00	20.00	30.00	25.75

Source: JPM Commodities team, All forecasts are averages of the contract months within the calendar perio

Our Commodities team is projecting gas prices to remain range-bound for the remainder of this year.

Figure 16: CO2 price

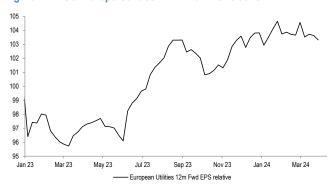

Source: Bloomberg Finance L.P.

Another factor driving lower power prices was the fall in CO2 prices. While supply-demand is more difficult to model here, we see limited further downside risk given the recent weakness and the more medium-term focus on decarbonization. Overall, power prices are still higher than pre-Ukraine, but the sector is trading cheaper than then.

3) Earnings for the sector have been holding up

Figure 17: MSCI Europe Utilities 12m Fwd EPS relative

Source: IBES

Earnings for the sector has been quite resilient despite the fall in power prices.

Table 6: European sectors 12m fwd PE

	12m Fwd PE							
Europe	Current	Median	Current vs Median					
IT	20.9	19.6	7%					
Industrials	14.1	14.9	-5%					
Materials	11.6	12.6	-8%					
Market	10.3	13.4	-23%					
Healthcare	12.6	16.6	-24%					
Discretionary	10.0	13.6	-26%					
Com Services	10.2	14.2	-28%					
Staples	12.0	17.0	-29%					
Utilities	9.0	13.7	-34%					
Financials	6.8	10.9	-38%					
Real Estate	10.3	18.7	-45%					
Energy	5.9	12.3	-52%					

Source: IBES

At 9x P/E, the sector currently trades at a 34% discount versus historical multiples. Only Energy, Real Estate and Financials are trading cheaper versus their historical valuations.

Figure 18: European Utilities 12m Fwd PE relative

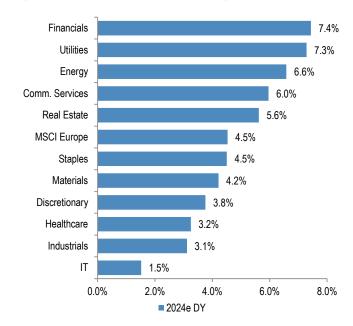

Source: IBES

The P/E multiple of Utilities has derated relative to the broader market and is now more than 1 standard deviation below historical.

4. The sector offers attractive dividends and could potentially even increase payouts further

Figure 19: European sectors 2024e dividend yield

Source: IBES

Utilities offer one of the highest dividend yields across European sectors. Our analysts believe that the sector could work with regulators to increase the attractiveness of their payouts, as they look for fresh capital to fund the development of the infrastructure needed for the energy transition, including power networks, green hydrogen projects or energy storage facilities.

Recent communication from a number of regulators in the region have stressed the need to offer safe and attractive returns to investments, commensurate with an environment of higher interest rates and more competition for capital. In the UK the regulator, OFGEM, at the end of 2023 stated officially that it will be developing the notion of "investability", alongside its existing financeability assessment, "to retain and attract the equity capital that the sector requires". In Germany the BundesNetzAgentur implemented since the start of 2024 and allowed return for new investments in networks that was c. 200bp above the original proposal it had made.

All of this furthers the prospects of continued improvements in cash flow yields for new investments and enhanced visibility on the sustainability of such returns, which are the two pillars that sustain growing dividends from the Utilities sector in Europe.

5. Within Utilities, Renewables have been lagging but we believe that they could trade better going forward

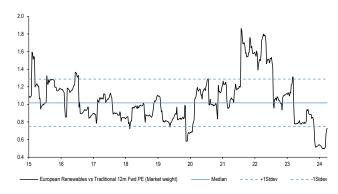

Figure 20: European Renewables relative to the overall market

Source: J.P.Morgan, Datastream

Renewable Utilities stocks were heavily penalized as the fixed returns on legacy assets lost their attractiveness to higher yields. Increasing cost of capital was a material concerns as well. The cost of funding might be peaking and may even come down over the coming quarters.

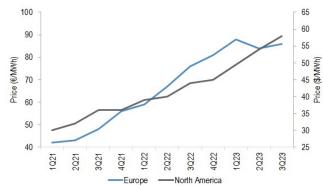

Figure 21: European Renewables 12m Fwd PE relative to Traditional

Source: IBES

We believe that the price weakness of the sub-sector is overdone and expect these names to trade better going forward.

Figure 22: Power Purchase Agreement prices

Source: JPM European Utilities team

We note that PPA (power purchase agreement) prices have been rising steadily and will help the profitability of the renewable space. Recent auctions have also seen sharp increases in prices offered per unit of renewable power.

Table 7: LCoE for different renewable technologies in Europe

			Solar		,	Wind Onshor	e		Wind Offshor	e

LCoE	€/MWh	27.3	44.4	74.5	36	53.6	79.9	60.5	95.6	144.6

Source: JPM European Utiltiies team estimates

The combination of technology improvements, scale benefits and high energy commodity prices means that wind and solar are competitive vs traditional fuels. Our sector analysts believe that the incremental volatility in wholesale power prices would drive more industrial clients to sign long-term renewable PPAs.

They estimate that at 5% cost of debt and 60% leverage a 6-7% pre-tax unlevered IRR equates to 7.6%-10% pre tax equity IRR. A 200bp spread over WACC would yield pre tax equity IRRs of 12.5-15%.

Our Utilities analysts like **EDP** and **SSE** in the renewable space. They also like **Enel**, **Engie**, **E.ON** and **Centrica** within their coverage.

The Real Estate sector should also benefit if yields move lower

Figure 23: MSCI Europe Real Estate relative ytd

Source: Datastream

The Real Estate sector has also had a very poor run so far this year. Like Utilities, the sector is seen as a bond proxy and would benefit if yields moved lower.

Within the sector, offices in particular suffered due to the structural changes brought on by COVID. However, utiliza-

tion rates are improving as more organizations push get employees back in offices.

Fundamentally, data centers and industrial demand remain robust and rental growth remains strong. Our analysts see **Segro** as a clear beneficiary.

Asset values remain the key consideration for investors looking at the sector. While the higher cost of borrowing has dealt a significant blow, we note that refinancing prospects are improving and we could be in the early stages of a recovery in pricing.

Figure 24: European Real Estate 12m Fwd PE relative

Source: IBES

The sector trades at very attractive valuations.

Equity Strategy Key Calls and Drivers

In terms of leadership, US and Japan are ahead of other markets ytd, Growth is outperforming Value and large caps are again beating small, in all key regions. We continue to believe that this style of leadership will broadly stay the case for a while longer, until there is a break, or a rest, in the cycle. For Value, commodities, low Quality, small caps, EM or International stocks to begin leading more sustainable one needs to see a reflationary backdrop, in our view, but we could have the opposite. Within this, we have recently taken profits on US vs Eurozone OW, as the Eurozone risk-reward has improved, in our view. Among other, Eurozone valuations appear very attractive, relative growth momentum could be bottoming out and ECB could start moving ahead of the Fed, which would be very atypical. We also have a tactical buy on China given extreme cheapness and UW positioning by most investors. Broadly, JPM Fixed Income's call is that bond yields are fundamentally set to move lower in 2H, but we note a pickup in inflation swaps as well as the outright negative term premia for bonds again, which suggest that there is a lot of complacency in the bond market with respect to the inflation risk. Consequently, the gap that has opened up ytd between Fed futures and the equity market is getting wider. Equities rallied almost 30% from last October lows, driven in Nov-Dec by the expectation of a Fed pivot, but these projections have fully reversed back to October low levels. Equities are ignoring the most recent pivot of a pivot, which might be a mistake. The assumption that the market is likely making here is one of growth acceleration coming to the rescue in 2H. in this regard, we note that earnings projections for 2024 are still not moving up. Regionally, Japan is staying our top pick, continuing our 2023 preference.

Table 8: J.P. Morgan Equity Strategy — Factors driving our medium-term views

Driver	Impact	Our Core Working Assumptions	Recent Developments
Global Growth	Neutral	At risk of weakening as consumer strength wanes	Global composite PMI is at 52.1
European Growth	Negative	Manufacturing and services are converging on the downside; industry data stays weak	
Monetary Policy	Neutral	Fed pivot could be accompanied by activity weakness	
Currency	Neutral	USD could strengthen again	
Earnings	Negative	Corporate pricing power is likely to weaken from here	2024 EPS projections are continuing their downtrend
Valuations	Negative	At 21x, US forward P/E is still stretched, especially vs real yield	MSCI Europe on 13.8x Fwd P/E
Technicals	Negative	Sentiment and positioning are stretched post the Nov-Dec rally	RSIs are in overbought territory

Source: J.P. Morgan estimates

Table 12: J.P. Morgan Equity Strategy — Key sector calls*

Sector	Recommendations	Key Drivers
Healthcare	Overweight	Potential for lower yields and stronger dollar remain near term support, earnings are also holding up
Staples	Overweight	Sector is one of the best performers around the last Fed hike in the cycle, lower bond yields and better relative EPS momentum should further support
Banks	Underweight	Downgraded to UW in October after 3 years of strong performance. Bond yields and PMIs direction is the key for the potential P/E re-rating of the sector, we think both will move lower
Chemicals	Underweight	The sector trades at 70% premium to the market, well above historical norm. pricing continues to deteriorate, downside risks to current earnings and margin projections

Source: J.P. Morgan estimates. * Please see the last page for the full list of our calls and sector allocation.

Table 13: J.P. Morgan Equity Strategy — Key regional calls

Region	Recommendations	J.P. Morgan Views
EM	Neutral	China tactical chance for a bounce, but structural bearish call remains
DM	Neutral	
US	Neutral	Expensive, with earnings risk. Growth style at a risk of reversal
Japan	Overweight	Japan is attractively priced; diverging policy path and TSE reforms are tailwinds
Eurozone	Neutral	Eurozone trading at a record discount vs the US, Growth differential to improve
UK	Overweight	Valuations still look very attractive, low beta with the highest regional dividend yield

Global Markets Strategy 08 April 2024

Click **here** for our weekly podcast

Anamil Kochar (anamil.kochar@jpmchase.com) of J.P. Morgan India Private Limited is a co-author of this report.

Companies Discussed in This Report (all prices in this report as of market close on 05 April 2024, unless otherwise indicated) Centrica(CNA.L/124p/OW), E.ON(EONGn.DE/€12.40/OW), EDP(EDP.LS/€3.49/OW), ENEL(ENEI.MI/€5.91/OW), Engie(ENGIE.PA/£15.40/OW), SEGRO(SGRO.L/867p/OW), SSE Plc(SSE.L/1,590p/OW)

Analyst Certification: The Research Analyst(s) denoted by an "AC" on the cover of this report certifies (or, where multiple Research Analysts are primarily responsible for this report, the Research Analyst denoted by an "AC" on the cover or within the document individually certifies, with respect to each security or issuer that the Research Analyst covers in this research) that: (1) all of the views expressed in this report accurately reflect the Research Analyst's personal views about any and all of the subject securities or issuers; and (2) no part of any of the Research Analyst's compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the Research Analyst(s) in this report. For all Korea-based Research Analysts listed on the front cover, if applicable, they also certify, as per KOFIA requirements, that the Research Analyst's analysis was made in good faith and that the views reflect the Research Analyst's own opinion, without undue influence or intervention.

All authors named within this report are Research Analysts who produce independent research unless otherwise specified. In Europe, Sector Specialists (Sales and Trading) may be shown on this report as contacts but are not authors of the report or part of the Research Department.

Important Disclosures

Company-Specific Disclosures: Important disclosures, including price charts and credit opinion history tables, are available for compendium reports and all J.P. Morgan-covered companies, and certain non-covered companies, by visiting https://www.jpmm.com/research/disclosures, calling 1-800-477-0406, or e-mailing <u>research.disclosure.inquiries@jpmorgan.com</u> with your request.

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:

J.P. Morgan uses the following rating system: Overweight (over the duration of the price target indicated in this report, we expect this stock will outperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); Neutral (over the duration of the price target indicated in this report, we expect this stock will perform in line with the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); and Underweight (over the duration of the price target indicated in this report, we expect this stock will underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe. NR is Not Rated. In this case, J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap Equity Research, each stock's expected total return is compared to the expected total return of a benchmark country market index, not to those Research Analysts' coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying Research Analyst's coverage universe can be found on J.P. Morgan's Research website, https://www.jpmorganmarkets.com.

J.P. Morgan Equity Research Ratings Distribution, as of April 06, 2024

	Overweight (buy)	Neutral (hold)	Underweight (sell)
J.P. Morgan Global Equity Research Coverage*	48%	39%	14%
IB clients**	49%	45%	35%
JPMS Equity Research Coverage*	46%	42%	12%
IB clients**	70%	66%	52%

For purposes of FINRA ratings distribution rules only, our Overweight rating falls into a buy rating category; our Neutral rating falls into a hold rating category; and our Underweight rating falls into a sell rating category. Please note that stocks with an NR designation are not included in the table above. This information is current as of the end of the most recent calendar quarter.

Equity Valuation and Risks: For valuation methodology and risks associated with covered companies or price targets for covered companies, please see the most recent company-specific research report at http://www.jpmorganmarkets.com, contact the primary analyst or your J.P. Morgan representative, or email research.disclosure.inquiries@jpmorgan.com. For material information about the proprietary models used, please see the Summary of Financials in company-specific research reports and the Company Tearsheets, which are available to download on the company pages of our client website, http://www.jpmorganmarkets.com. This report also sets out within it the material underlying assumptions used.

A history of J.P. Morgan investment recommendations disseminated during the preceding 12 months can be accessed on the Research & Commentary page of http://www.jpmorganmarkets.com where you can also search by analyst name, sector or financial instrument.

Analysts' Compensation: The research analysts responsible for the preparation of this report receive compensation based upon various factors, including the quality and accuracy of research, client feedback, competitive factors, and overall firm revenues.

^{*}Please note that the percentages may not add to 100% because of rounding.
**Percentage of subject companies within each of the "buy," "hold" and "sell" categories for which J.P. Morgan has provided investment banking services within the previous 12 months.

Registration of non-US Analysts: Unless otherwise noted, the non-US analysts listed on the front of this report are employees of non-US affiliates of J.P. Morgan Securities LLC, may not be registered as research analysts under FINRA rules, may not be associated persons of J.P. Morgan Securities LLC, and may not be subject to FINRA Rule 2241 or 2242 restrictions on communications with covered companies, public appearances, and trading securities held by a research analyst account.

Other Disclosures

J.P. Morgan is a marketing name for investment banking businesses of JPMorgan Chase & Co. and its subsidiaries and affiliates worldwide.

UK MIFID FICC research unbundling exemption: UK clients should refer to **UK MIFID Research Unbundling exemption** for details of J.P. Morgan's implementation of the FICC research exemption and guidance on relevant FICC research categorisation.

All research material made available to clients are simultaneously available on our client website, J.P. Morgan Markets, unless specifically permitted by relevant laws. Not all research content is redistributed, e-mailed or made available to third-party aggregators. For all research material available on a particular stock, please contact your sales representative.

Any long form nomenclature for references to China; Hong Kong; Taiwan; and Macau within this research material are Mainland China; Hong Kong SAR (China); Taiwan (China); and Macau SAR (China).

J.P. Morgan Research may, from time to time, write on issuers or securities targeted by economic or financial sanctions imposed or administered by the governmental authorities of the U.S., EU, UK or other relevant jurisdictions (Sanctioned Securities). Nothing in this report is intended to be read or construed as encouraging, facilitating, promoting or otherwise approving investment or dealing in such Sanctioned Securities. Clients should be aware of their own legal and compliance obligations when making investment decisions.

Any digital or crypto assets discussed in this research report are subject to a rapidly changing regulatory landscape. For relevant regulatory advisories on crypto assets, including bitcoin and ether, please see https://www.ipmorgan.com/disclosures/cryptoasset-disclosure.

The author(s) of this research report may not be licensed to carry on regulated activities in your jurisdiction and, if not licensed, do not hold themselves out as being able to do so.

Exchange-Traded Funds (ETFs): J.P. Morgan Securities LLC ("JPMS") acts as authorized participant for substantially all U.S.-listed ETFs. To the extent that any ETFs are mentioned in this report, JPMS may earn commissions and transaction-based compensation in connection with the distribution of those ETF shares and may earn fees for performing other trade-related services, such as securities lending to short sellers of the ETF shares. JPMS may also perform services for the ETFs themselves, including acting as a broker or dealer to the ETFs. In addition, affiliates of JPMS may perform services for the ETFs, including trust, custodial, administration, lending, index calculation and/or maintenance and other services.

Options and Futures related research: If the information contained herein regards options- or futures-related research, such information is available only to persons who have received the proper options or futures risk disclosure documents. Please contact your J.P. Morgan Representative or visit https://www.theocc.com/components/docs/riskstoc.pdf for a copy of the Option Clearing Corporation's Characteristics and Risks of Standardized Options or https://www.finra.org/sites/default/files/Security_Futures_Risk_Disclosure_Statement_2018.pdf for a copy of the Security Futures Risk Disclosure Statement.

Changes to Interbank Offered Rates (IBORs) and other benchmark rates: Certain interest rate benchmarks are, or may in the future become, subject to ongoing international, national and other regulatory guidance, reform and proposals for reform. For more information, please consult: https://www.jpmorgan.com/global/disclosures/interbank_offered_rates

Private Bank Clients: Where you are receiving research as a client of the private banking businesses offered by JPMorgan Chase & Co. and its subsidiaries ("J.P. Morgan Private Bank"), research is provided to you by J.P. Morgan Private Bank and not by any other division of J.P. Morgan, including, but not limited to, the J.P. Morgan Corporate and Investment Bank and its Global Research division.

Legal entity responsible for the production and distribution of research: The legal entity identified below the name of the Reg AC Research Analyst who authored this material is the legal entity responsible for the production of this research. Where multiple Reg AC Research Analysts authored this material with different legal entities identified below their names, these legal entities are jointly responsible for the production of this research. Research Analysts from various J.P. Morgan affiliates may have contributed to the production of this material but may not be licensed to carry out regulated activities in your jurisdiction (and do not hold themselves out as being able to do so). Unless otherwise stated below, this material has been distributed by the legal entity responsible for production. If you have any queries, please contact the relevant Research Analyst in your jurisdiction or the entity in your jurisdiction that has distributed this research material.

Material relating to equity securities is issued and distributed in Taiwan by J.P. Morgan Securities (Taiwan) Limited, subject to the license scope and the applicable laws and the regulations in Taiwan. According to Paragraph 2, Article 7-1 of Operational Regulations Governing Securities Firms Recommending Trades in Securities to Customers (as amended or supplemented) and/or other applicable laws or regulations, please note that the recipient of this material is not permitted to engage in any activities in connection with the material that may give rise to conflicts of interests, unless otherwise disclosed in the "Important Disclosures" in this material. Thailand: This material is issued and distributed in Thailand by JPMorgan Securities (Thailand) Ltd., which is a member of the Stock Exchange of Thailand and is regulated by the Ministry of Finance and the Securities and Exchange Commission, and its registered address is 3rd Floor, 20 North Sathorn Road, Silom, Bangrak, Bangkok 10500. UK: Unless specified to the contrary, research is distributed in the UK by J.P. Morgan Securities plc ("JPMS plc") which is a member of the London Stock Exchange and is authorised by the Prudential Regulation Authority and regulated by the Financial Conduct Authority and the Prudential Regulation Authority. JPMS plc is registered in England & Wales No. 2711006, Registered Office 25 Bank Street, London, E14 5JP. This material is directed in the UK only to: (a) persons having professional experience in matters relating to investments falling within article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) (Order) 2005 ("the FPO"); (b) persons outlined in article 49 of the FPO (high net worth companies, unincorporated associations or partnerships, the trustees of high value trusts, etc.); or (c) any persons to whom this communication may otherwise lawfully be made; all such persons being referred to as "UK relevant persons". This material must not be acted on or relied on by persons who are not UK relevant persons. Any investment or investment activity to which this material relates is only available to UK relevant persons and will be engaged in only with UK relevant persons. Research issued by JPMS plc has been prepared in accordance with JPMS plc's policy for prevention and avoidance of conflicts of interest related to the production of Research which can be found at the following link: J.P. Morgan EMEA - Research Independence Policy. U.S.: J.P. Morgan Securities LLC ("JPMS") is a member of the NYSE, FINRA, SIPC, and the NFA. JPMorgan Chase Bank, N.A. is a member of the FDIC. Material published by non-U.S. affiliates is distributed in the U.S. by JPMS who accepts responsibility for its content.

General: Additional information is available upon request. The information in this material has been obtained from sources believed to be reliable. While all reasonable care has been taken to ensure that the facts stated in this material are accurate and that the forecasts, opinions and expectations contained herein are fair and reasonable, JPMorgan Chase & Co. or its affiliates and/or subsidiaries (collectively J.P. Morgan) make no representations or warranties whatsoever to the completeness or accuracy of the material provided, except with respect to any disclosures relative to J.P. Morgan and the Research Analyst's involvement with the issuer that is the subject of the material. Accordingly, no reliance should be placed on the accuracy, fairness or completeness of the information contained in this material. There may be certain discrepancies with data and/or limited content in this material as a result of calculations, adjustments, translations to different languages, and/or local regulatory restrictions, as applicable. These discrepancies should not impact the overall investment analysis, views and/or recommendations of the subject company(ies) that may be discussed in the material. J.P. Morgan accepts no liability whatsoever for any loss arising from any use of this material or its contents, and neither J.P. Morgan nor any of its respective directors, officers or employees, shall be in any way responsible for the contents hereof, apart from the liabilities and responsibilities that may be imposed on them by the relevant regulatory authority in the jurisdiction in question, or the regulatory regime thereunder. Opinions, forecasts or projections contained in this material represent J.P. Morgan's current opinions or judgment as of the date of the material only and are therefore subject to change without notice. Periodic updates may be provided on companies/industries based on company-specific developments or announcements, market conditions or any other publicly available information. There can be no assurance that future results or events will be consistent with any such opinions, forecasts or projections, which represent only one possible outcome. Furthermore, such opinions, forecasts or projections are subject to certain risks, uncertainties and assumptions that have not been verified, and future actual results or events could differ materially. The value of, or income from, any investments referred to in this material may fluctuate and/or be affected by changes in exchange rates. All pricing is indicative as of the close of market for the securities discussed, unless otherwise stated. Past performance is not indicative of future results. Accordingly, investors may receive back less than originally invested. This material is not intended as an offer or solicitation for the purchase or sale of any financial instrument. The opinions and recommendations herein do not take into account individual client circumstances, objectives, or needs and are not intended as recommendations of particular securities, financial instruments or strategies to particular clients. This material may include views on structured securities, options, futures and other derivatives. These are complex instruments, may involve a high degree of risk and may be appropriate investments only for sophisticated investors who are capable of understanding and assuming the risks involved. The recipients of this material must make their own independent decisions regarding any securities or financial instruments mentioned herein and should seek advice from such independent financial, legal, tax or other adviser as they deem necessary. J.P. Morgan may trade as a principal on the basis of the Research Analysts' views and research, and it may also engage in transactions for its own account or for its clients' accounts in a manner inconsistent with the views taken in this material, and J.P. Morgan is under no obligation to ensure that such other communication is brought to the attention of any recipient of this material. Others within J.P. Morgan, including Strategists, Sales staff and other Research Analysts, may take views that are inconsistent with those taken in this material. Employees of J.P. Morgan not involved in the preparation of this material may have investments in the securities (or derivatives of such securities) mentioned in this material and may trade them in ways different from those discussed in this material. This material is not an advertisement for or marketing of any issuer, its products or services, or its securities in any
