LVS 4Q14 Takeaways–Slightly Below in Macau; Modestly Lowering 2015 Macau EBITDA; PT Remains \$60

Overall, LVS's 4Q14 Macau EBITDA result was slightly below our estimate but north of the \$700m that we think the buy-side was expecting (each inclusive of favorable table hold) and margins there were essentially flat year-over year on a normalized basis. In Singapore, a sizable headline EBITDA beat includes a one-time property tax refund benefit and favorable hold as well; adjusting for these two items property level EBITDA there was slightly ahead of our estimate. LV Strip RevPAR was surprisingly down 3% year-over-year, which we would attribute to simply losing share and underperforming its peers there. We thought Macau base mass would fare much better than premium mass and that was the case, but base mass was still down year-over-year (-2% versus premium mass down 18%). There was little color on current Macau operating trends (our view is that it is still very tough given Beijing's focus on curbing corruption/Macau government limiting smoking), nor was there any commentary that "things are less bad" in Macau, something that we think couldn't be stated in any event.

- Looking ahead, our 2015 estimates are modestly lower (-3.0%) in Macau (to \$2.898b with sub-\$700m EBITDA in the 1Q15 and 2Q15 and modest improvements in both the 3Q15 and 4Q15). Our 2015 Singapore property level EBITDA remains \$1.5b. Our price target remains \$60, which implies ~12% upside including the 4.6% annual dividend yield.
- Our views here on LVS and the Macau names are unchanged. We'd like to think we are close to being done with estimate cuts, but don't want to fall into this trap, as we thought we were close two months ago. Rather, we think investor sentiment is close to bottoming once we get through 4Q14 earnings season (which just started with LVS; others report next month) and have a sense of how bad 1Q15 will be (we are estimating a mid 20% yoy decline in GGR). We believe there is particularly limited visibility on the revenue side (stating the obvious) and the reclassification of certain mass revenues/tables into VIP revenues (so operators could lessen/avert the smoking ban impact) makes forecasting margins with any precision particularly challenging.

- Our views here continued. We believe these stocks should ideally be bought at lower levels in anticipation of easier comparisons starting in the 2Q/2H15—a period where the current poor sentiment should reverse given the Macau market's medium-term penetration opportunity and fairly negative sentiment. But, in general and in the near term, we see reasonable floors at levels ~10% lower than where they are now (i.e., at levels experienced in mid December). We also think new property/rooms from the two new property openings (Galaxy and Studio city) in 2H15 will draw more mass revenues.
- Macau recap. VIP rolling chip volumes were down by 11% sequentially and 44% year-over-year (market was down 8% and 35%, respectively). LVS's mass table revenue fell 9% year-over-year (market down 16%) with base mass table revenues down 2% year-over-year (stable in this environment) and a 17% sequential decline in premium mass table revenue. Table yield for base mass decreased by 2% year-over-year to US\$8.5k/day, and premium mass yield fell 18% year-over-year to US\$15.5k/day. Slot revenue increased by ~10% year-over-year, as did retail mall revenue. EBITDA margin increased by 50bps year-over-year to 33.9%, but was ~80 bps below our 34.7% estimate.
- Singapore recap. Marina Bays Sands (MBS) net revenues came in at \$838.6 million, \$69.3m above our \$769.3m estimate. Property-level EBITDA was \$518.5m (inclusive of a one-time \$90.1m property tax credit), \$148.8m above our estimate. Adjusted for hold and excluding the one-time property tax credit, property-level EBITDA was ~\$370m and inline with our estimate. Year-over-year rolling (VIP) chip table game volume decreased 26.8%, however, VIP rolling win percentage was 3.6% (versus 1.9% in the year ago period and our 2.85% estimate). Non-rolling chip table game drop was -3.3% year-over-year, while hold of 26.7% was ~110 bps above our 25.6% estimate. Slot volumes were +10.6% year-over-year.
- **4Q14 Las Vegas metrics.** 4Q14 net revenues for the Las Vegas operations (Venetian & Palazzo) were \$362.6m, down 6.0% year-over-year and \$18.4m below our estimate for the period. EBITDAR margins in Las Vegas came in at 21.5%, down 140 bps year-over-year and 100 bps below our 22.5% estimate. Property-level EBITDAR for the Las Vegas operations (Venetian & Palazzo) was \$78.0m, \$7.9m below our \$85.8m estimate, and down 11.6% year-over-year. RevPAR was down 2.5% at \$180.

- We remain Overweight LVS. We maintain our Overweight rating as over the longer term we find Macau to possess attractive supply and demand dynamics supported by infrastructure enhancements and continued mass related penetration opportunity into Mainland China. We also highlight its solid free cash flow generation, which we would expect to be deployed into sizable dividend increases, and, given the recent share price underperformance, a reasonable valuation that reflects lowered investor expectations given a market-wide step down in operating momentum. In the near term, however, we expect the Macau stocks to be volatile and recommend investors use the volatility on the downside to build long positions. Given LVS's successes in both Macau and Singapore as well as a healthy balance sheet, we also like its option value related to the potential for it to participate in newer markets, though we don't specifically see much progress in Japan in the near term.
- **PT remains \$60.** Our December 2015 price target of \$60 is based on multiples of 10.0x 2016E LV EBITDAR, 12.5x 2016E Macau EBITDAR (adjusted for 70.3% interest), 12.0x 2016E Singapore EBITDAR, 12.5x Sands China royalty fees, and 90% of 9.0x our 2016E PA EBITDAR, less 2016E year-end net debt. We also ascribe value (~\$3.40 NPV per share) to its Parisian/Site 3 Cotai development project, based on \$2.7 billion of capital expenditures, and a stabilized 20.0% EBITDA ROIC, discounted back 10% per year. Our valuation multiples are consistent with those of LVS's LV/Macau-centric peers.
- **Current valuation.** At current levels, LVS trades at 13.2x 2015E EV/EBITDA, 12.3x 2016E EV/EBITDA, and 10.8x 2017E EV/EBITDA (all adjusted for Macau minority interest). This compares with its historical EV/EBITDA range of 3.5-57.7x and below its one-year-forward EV/EBITDA average multiple of 18.4x. We view these multiples as reasonably attractive in light of our discretionary free cash flow per share estimates of \$3.71 in 2015, \$3.97 in 2016, and \$4.41 in 2017.
- **Read on.** Our detailed write-up of the 4Q14, comprehensive model, easy-to-read charts on Macau, Singapore, and Las Vegas trends as well as our valuation work are attached in the body of this note.

1. This schedule presents hold-adjusted adjusted property EBITDA based on the following methodology:

(a) for Macao operations and Marina Bay Sands: if the quarter's junket and/or premium direct rolling win percentage is outside of the

2.70% -3.00% band, then a hold-adjustment is calculated by applying the respective segment's trailing twelve months win

percentage to the rolling table volume in that segment for the quarter

(b) for Las Vegas operations and Sands Bethlehem: calculated by applying the trailing twelve months win percentage to each

quarter's table games drop

(c) for all properties: gaming taxes on incremental win are applied to determine the EBITDA impact

2. Reflects consolidated EBITDA inclusive of Other Asia segment

Investment Thesis, Valuation and Risks

Las Vegas Sands Corp. (Overweight; Price Target: \$60.00)

Investment Thesis

We maintain our Overweight rating as over the longer term we find Macau to possess attractive supply and demand dynamics supported by infrastructure enhancements and continued mass related penetration opportunity into Mainland China. We also highlight its solid free cash flow generation, which we would expect to be deployed into sizable dividend increases, and, given the recent share price underperformance, a reasonable valuation that reflects lowered investor expectations given a market-wide step down in operating momentum. In the near term, however, we expect the Macau stocks to be volatile and recommend investors use the volatility on the downside to build long positions. Given LVS's successes in both Macau and Singapore as well as a healthy balance sheet, we also like its option value related to the potential for it to participate in newer markets, though we don't specifically see much progress in Japan in the near term.

Valuation

At current levels, LVS trades at 13.2x 2015E EV/EBITDA, 12.3x 2016E EV/EBITDA, and 10.8x 2017E EV/EBITDA (all adjusted for Macau minority interest). This compares with its historical EV/EBITDA range of 3.5-57.7x and below its one-year-forward EV/EBITDA average multiple of 18.4x. We view these multiples as reasonably attractive in light of our discretionary free cash flow per share estimates of \$3.71 in 2015, \$3.97 in 2016, and \$4.41 in 2017.

Our December 2015 price target of \$60 is based on multiples of 10.0x 2016E LV EBITDAR, 12.5x 2016E Macau EBITDAR (adjusted for 70.3% interest), 12.0x 2016E Singapore EBITDAR, 12.5x Sands China royalty fees, and 90% of 9.0x our

2016E PA EBITDAR, less 2016E year-end net debt. We also ascribe value (~\$3.40 NPV per share) to its Parisian/Site 3 Cotai development project, based on \$2.7 billion of capital expenditures, and a stabilized 20.0% EBITDA ROIC, discounted back 10% per year. Our valuation multiples are consistent with those of LVS's LV/Macaucentric peers.

Risks to Rating and Price Target

Number of Diluted Shares

Risks here relate to (1) additional regulatory investigations related to compliance with the Foreign Corrupt Practices Act (FCPA) or related negative headlines; (2) U.S. investor sentiment swings related to equity valuation swings in the global equity markets; (3) potential restrictions relating to Macau travel or other government policies that would be aimed at curbing market growth; (4) volatility associated with investor expectations on monthly Macau market revenues results/growth and market share; (5) executing on its Singapore VIP ramp; (6) heightened competition in Asia and the U.S.; and (7) a more meaningful consumer slowdown in Asia or the U.S.

The chart(s) show J.P. Morgan's continuing coverage of the stocks; the current analysts may or may not have covered it over the entire period.

J.P. Morgan ratings or designations: OW = Overweight, N= Neutral, UW = Underweight, NR = Not Rated

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:

J.P. Morgan uses the following rating system: Overweight [Over the next six to twelve months, we expect this stock will outperform the average total return of the stocks in the analyst's (or the analyst's team's) coverage universe.] Neutral [Over the next six to twelve months, we expect this stock will perform in line with the average total return of the stocks in the analyst's (or the analyst's team's) coverage universe.] Underweight [Over the next six to twelve months, we expect this stock will underperform the average total return of the stocks in the analyst's (or the analyst's team's) coverage universe.] Not Rated (NR): J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. In our Asia (ex-Australia) and U.K. small- and mid-cap equity research, each stock's expected total return is compared to the expected total return of a benchmark country market index, not to those analysts' coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying analyst's coverage universe can be found on J.P. Morgan's research website, www.jpmorganmarkets.com.

Coverage Universe: Greff, Joseph: Belmond Ltd (BEL), Boyd Gaming Group (BYD), Chesapeake Lodging Trust (CHSP), Choice Hotels International (CHH), Diamond Resorts International (DRII), Extended Stay America (STAY), FelCor Lodging Trust (FCH), Gaming and Leisure Properties, Inc. (GLPI), Hilton Worldwide (HLT), Host Hotels & Resorts Inc.
